More Product Choices from Tru Vue

McCOOK, ILLINOIS (June 1, 2011) – Now there are even more high-quality glazing options available from Tru Vue. Tru Vue is excited to announce the introduction of its new UltraVue[®] product line as well as the addition of its new, larger glass size 48"x68".

Tru Vue now offers a 2mm, water white, anti-reflective glass product, UltraVue[®]. The glass product is a good alternative when clarity is an important framing objective and conservation grade UV protection is not a concern.

UltraVue blocks 65% of UV light and offers the same superior anti-reflective properties that you've come to expect from Tru Vue. The 2mm water white substrate provides pristine color neutrality and Tru Vue's proprietary anti-reflective coating process delivers an almost invisible finish, allowing the framed piece to be viewed in its truest form without distracting reflections.

UltraVue is now available through authorized Tru Vue distributors and can be purchased in a variety of sizes, including 32" x 40", 36" x 48", 40" x 60" and our newest size 48" x 68".

Tru Vue is also adding the new 48" x 68" size to the available sizes for Museum Glass[®] and Conservation Clear[®]. This will give you more glazing options when framing oversized pieces.

Contact your Tru Vue distributor for size availability and pricing. For additional product related questions, please visit www.tru-vue.com or call the Framer's Helpline at 800-282-8788

###

Tru Vue is a manufacturer of high performance glazing products for the custom picture framing and museum markets. Tru Vue is a leader in both UV protection, as well as anti-reflective and specialty glazing products for these markets. The company is located in McCook, Illinois and Faribault, Minnesota and is a subsidiary

of Apogee Enterprises, Inc. (Nasdaq: APOG). For more information on Tru Vue, visit the company website at www.tru-vue.com.
